

CAN YOU DO THIS TYPE OF THERAPY?

There are certain conditions that may prohibit you from receiving VST therapy at our clinic or may need a release from your Doctor. Please read the following carefully. If any of these problems exist, call the clinic so we can discuss all the details.

- Active Cancer
- History of Cancer
- Implanted Defibrillator (Pacemaker- only if treating Upper Extremity)
- Implanted neuro-stimulator in the back
- History of a blood clot less than 1 year ago
- Current infection
- History of severe burns
- Epilepsy
- Seizure less than 1 year ago
- Pregnant

Call the clinic if you have one of these problems so we can determine if you can receive therapy. 972-867-0600
